Thanks Guys. Looks like a good meeting of ideas but what is clear from all is that we require a plan for the ask. What do we want them to do? If they are reluctant to pull over convoy vehicles for inspection was there any details as to why? It seems from there messaging that they are letting the PLT do their thing and do not wish to over enforce to compromise that work. However OPS only segment says the complete opposite. We certainly need better coordination but that is not for you guys
I know we are working on a plan but I hope we highlight the fuel inspection part of any depots located. Like to know if authority to seize exists under this act? I think we can get that done we can get some support in this key area that we do not have expertise in.
Jamie
